## Need to Process ID Photos for Multiple Campuses?

Hey,

We get it. You need a university photo upload system that *doesn't just handle one campus — but several.*

Versatile, university-branded, and intricately customizable, MyPhoto is the perfect solution. **We designed MyPhoto to leverage multiple campuses across a single, user-friendly platform.**

### One Platform — Multiple Campuses

We provide a seamless system *segueing across multiple campuses and departments on a single integrated platform.*

MyPhoto features email templates in the admin panel that can be differentiated with customized text according to each particular campus. The software will automatically note each particular campus based upon data attributes or selection from the drop down menu.

**Photos can be approved with a simple click and registered in a distinct directory for each campus.** Every campus can then access their unique directory to import and print the cards. Every action is time-stamped and dated with the admin username for data clarity.

**The system is seamless and easy to use across multiple campuses.**

## **Sign Up for a FREE DEMO**

**MyPhoto is successfully used by millions of students at some of the top universities in the country.**
